

Large-scale civil pipework for water, sewage, stormwater and gas.

Murphy's Plumbing Services specialises in civil and industrial plumbing for complex infrastructure projects. With expertise in materials like PE 100 polyethylene, Ductile Iron Cement Lines (DICL), stainless steel press fit, copper press fit, PVC, and concrete, we deliver durable solutions tailored to every project. Recent projects range from large-scale infrastructure works to small and medium civil plumbing jobs.

HOW BUILDERS ENGAGE US

Pipework subcontract	Water supply, sewage, stormwater and gas pipework for civil infrastructure projects, from deep trenching and manhole installations to treatment plant piping.
PE 100 welding	Electrofusion and butt welding of PE 100 polyethylene, by a crew certified in PE 100 installations, Electrofusion and Butt Welding.
Plant hire, wet or dry	A 22-tonne and a 5-tonne excavator, with one of our operators (wet) or on their own for your operator (dry).

CAPABILITY

Scopes, materials, installations and certifications.

SCOPES
Water supply
Sewage
Stormwater
Gas
Deep trenching
Manhole installations
Treatment plant piping

MATERIALS
PE 100 polyethylene
Ductile Iron Cement Lined (DICL)
Steel
Stainless steel press fit
Copper press fit
PVC
Concrete

INSTALLATIONS AND CERTIFICATIONS
Steel and DICL installations
PE 100 Electrofusion
PE 100 Butt Welding
Press Fit
PE 100 installations (certified)
Electrofusion (certified)
Butt Welding (certified)

PLANT, WET OR DRY HIRE

22-tonne excavator	Wet or dry hire
5-tonne excavator	Wet or dry hire
Crew	Licensed plumbers, pipe layers and excavator operators
